Contributions should, preferably, be sent to a member of the Advisory Editorial Board who is familiar with the research reported, or to one of the Editors:

L. JANSEN
Editor of Chemical Physics Letters
(on sabbatical leave from the Journal)

R.B. BERNSTEIN
Editor of Chemical Physics Letters
Department of Chemistry
Columbia University
New York, N.Y. 10027, USA

A.D. BUCKINGHAM, F.R.S.
Editor of Chemical Physics Letters
University Chemical Laboratory
Lensfield Road
Cambridge CB2 1EW, UK

in which case authors from the Western Hemisphere are requested to send their manuscripts to the USA Editor.
Important: please adhere to instructions to authors, to be found on the last page of each volume.

Chemical Physics Letters is published semi-monthly. The subscription price per volume is Dfl. 225.00 (approx. $115.25) excluding Dfl. 16.00 (approx. $8.25) postage. Claims for issues not received should be made within three months of publication. If not, they cannot be honoured free of charge.

Subscriptions should be sent to the publisher: NORTH-HOLLAND PUBLISHING COMPANY, P.O. Box 211, Amsterdam, The Netherlands, or to any subscription agent or bookseller.

Problems with Computer Programs?

WHY WASTE TIME AND MONEY DESIGNING AND TESTING YOUR OWN COMPUTER PROGRAM WHEN THE ONE YOU NEED MAY ALREADY BE AVAILABLE?

WE OFFER **2 POSSIBILITIES OF SOLVING YOUR PROBLEMS** IN COMPUTATIONAL PHYSICS AND COMPUTER PROGRAMS IN PHYSICS:

1. Computer Physics Communications

COMPUTER PHYSICS COMMUNICATIONS: the leading international journal publishing descriptions of computer programs in physics. It also publishes papers and letters on computational methods and the application of computers to physics in the following areas: descriptions of numerical methods; descriptions of computer techniques; general descriptions of programs in a particular field of physics or quantum chemistry; general descriptions of methods or programs associated with the design, running or analysis of experiments; descriptions of program languages and systems; programs which are of particular importance to physicists or quantum chemists; comments on previous publications in CPC; review papers in the general field of computational physics; and comments on manufacturers' hardware and software.

ISSN: 0010-4655

2. The Program Library

Affiliated to Computer Physics Communications is the CPC Program Library. This Library is a non-profitmaking organisation which holds and distributes all the programs published in Computer Physics Communications. The library offers a dual service: a subscription scheme designed for laboratories and institutes who wish to receive regularly all the contributed programs, and a service to scientists who require particular programs relevant to their research. Full details are available from the program librarian: C. Jackson, The Queen's University of Belfast, Belfast BT7 INN, Northern Ireland.

Please write for full details on the journal. We will gladly mail you a free copy of the journal and the cumulative program index of Computer Physics Communications.

PHYSICS REPORTS

a special discount offer - for private use only!

UPDATED SPRING 1980

From the publisher:

Over the past few years, the journal PHYSICS REPORTS has developed into one of the leading review journals for various branches of physics. To date, some 260 review articles have been published.

In the past, the journal was regarded primarily as a "library journal" by virtue of the fact that the publisher was obliged to charge a relatively high price for a single issue, owing to the individual postage, handling and invoicing charges involved.

In order to enable the research worker or graduate student to buy his own copy of a particular REPORT, the following scheme has been devised: North-Holland Publishing Co. is prepared to make single issues of PHYSICS REPORTS available to individuals only at the price of US $4.00, US $5.00, US $6.00 or US $7.00 (depending on the number of pages), providing that combined orders of at least US $50.00 are placed with us, and a cheque for the correct amount is enclosed with the order.

In effect, this means that you and your colleagues may combine your separate orders, as long as the collective order amounts to US $50.00 or more.

	Vol.	No.	US$
Classical areas of phenomenology (including applications)			
____ High resolution spectroscopy with lasers, W. Demtröder	7	5	5.00
____ Low amplitude turbulence, K. Elsässer	8	1	5.00
____ Time dependent correlation functions and mode–mode coupling theories, Y. Pomeau and P. Résibois	19	2	6.00
____ Several problems of the theory of transition radiation and transition scattering, V.L. Ginzburg and V.N. Tsytovich	49	1	6.00
____ Experiments in phenomenological electrodynamics and the electromagnetic energy-momentum tensor, I. Brevik	52	3	5.00
____ On the thermodynamics, structure and phase stability of the non-uniform fluid state, F.F. Abraham	53	2	5.00
____ On the theory of polarization effects in gas lasers, D. Lenstra	59	3	6.00
Fluids, plasmas and electric discharges			
____ Plasma physics of the solar atmosphere, S.A. Kaplan, S.B. Pikel'ner and V.N. Tsytovich	15	1	6.00
____ Quantum kinetic theory of polyatomic gases, H. Moraal	17	5	6.00
____ Plasma turbulent reactors: an astrophysical paradigm, C.A. Norman and D. ter Haar	17	6	5.00
____ The ideal Bose–Einstein gas revisited, R.M. Ziff, G.E. Uhlenbeck and M. Kac	32	4	6.00
____ Strong Langmuir turbulence, L.I. Rudakov and V.N. Tsytovich	40	1	5.00
____ Langmuir turbulence and modulation instability, S.G. Thornhill and D. ter Haar	43	2	5.00
____ The linear Boltzmann equation properties and solutions, C. Syros	45	4	6.00
____ Magnetospheric physics, K. Schindler and J. Birn	47	2	5.00
____ Nonlinear travelling waves in homogeneous cold collisionless plasma, A. Decoster	47	5	7.00
____ Renormalized turbulence theory for the ion acoustic problem, W. Horton Jr. and D. Choi	49	3	7.00
____ On the thermodynamics, structure and phase stability of the non-uniform fluid state, F.F. Abraham	53	2	5.00

	Vol.	No.	US$
____ Heavy-ion fusion: comparison of experimental data with classical trajectory models, J.R. Birkelund, L.E. Tubbs, J.R. Huizenga, D.N. De and D. Sperber	56	3	5.00
____ Equilibrium theories of simple liquids, N.K. Ailawadi	57	4	5.00
____ On the theory of polarization effects in gas lasers, D. Lenstra	59	3	6.00
Cross-disciplinary physics and related areas of science and technology			
____ Some applications of particle accelerators to cancer research and treatment, P.R. Almond	17	1	4.00
____ X-ray analysis and the structure of the components of plant cell walls, R.D. Preston	21	4	4.00
____ Radiopharmacenticals, H.L. Atkins	21	6	5.00
____ Polymers and scaling, D.S. McKenzie	27	2	5.00
____ What can low-energy nuclear physics tell us about elementary particles and quarks?, L.H. Ryder	34	2	5.00
____ Archaeological involvements of physics, M.J. Aitken	40	5	6.00
____ Micelles. Physical chemistry of surfactant association, H. Wennerström and B. Lindman	52	1	6.00
____ Nuclear reactor safety, J.L. Head, A.J.H. Goddard and P.J. Grant	53	4	6.00
____ Applications of ESR in photosynthesis, A.J. Hoff	54	2	7.00
____ Laser-Raman spectroscopy of living cells, S.J. Webb	60	4	4.00
Geophysics, astronomy and astrophysics			
____ Some recent developments in cosmic rays, A.M. Hillas	20	2	6.00
____ Hadronic interactions and cosmic radiation at energies above 10^5 GeV, C.B.A. McCusker	20	4	5.00
____ Spiral structure and the dynamics of galaxies, E. Dekker	24	5	6.00
____ Reversals of the Earth's magnetic field, J.A. Jacobs	26	5	4.00
____ Gravitons in Minkovski space-time. Interactions and results of astrophysical interest, G. Papini and S.R. Valluri	33	2	6.00
____ Gravitational waves and the detection of gravitational radiation, V.B. Braginsky and V.N. Rudenko	46	5	4.00
____ Bounds on the mass and moment of inertia of non-rotating neutron stars, J.B. Hartle	46	6	4.00
____ Magnetospheric physics, K. Schindler and J. Birn	47	2	5.00
____ Recent developments in meteorological physics, R.R. Rogers and G. Vali	48	2	7.00
____ Thermal properties and detectability of neuron stars – I.cooling and heating of neutron stars, S. Tsuruta	56	5	4.00
____ X-rays from neutron stars, G. Börner	60	3	5.00

Electronic and Atomic Collisions

Invited Papers

Proceedings of the 11th International Conference on the Physics of Electronic and Atomic Collisions (ICPEAC XI), Kyoto, Japan, August 29 - September 4, 1979.

edited by N. ODA, *Nuclear Reactor Research Laboratory, Tokyo Institute of Technology, and* K. TAKAYANAGI, *Institute of Space and Aeronautical Science, University of Tokyo, Japan.*

1980. xiv 844 pages
Price: US $109.75/Dfl. 225.00
ISBN 0-444-85434-7

The Kyoto Conference is one of a series of conferences, the first of which was held in New York in 1958. They are now held every two years.

In this volume, the texts of all the oral presentations at the Conference: 10 invited lectures and review talks, 17 progress reports and papers presented at 8 symposia, are included. The papers, listed below, deal with two-body interactions between ions, atoms, simple molecules, electrons (and positrons) and photons. The collision energies of interest range from subthermal to millions of electron volts.

This book and the Book of Abstracts of Contributed Papers together form the official scientific record of the Kyoto ICPEAC.

CONTENTS: **Invited Lectures and Review Talks.** Papers by: *H. C. Bryant, M. Inokuti, Y. Kaneko, J. Kistemaker, P. Richard, A. L. Schawlow, I. I. Sobel'man, A. Temkin, E. Weigold, F. J. Wuilleumier,* **Progress Reports.** Contributors: *N. Andersen, S. Andriamonje, P. Armbruster, Y. Awaya, H.-H. Behncke, F. Bosch, J. F. Chemin, R. N. Compton, J. L. Dehmer, D. Dill, J. S. Greenberg, W. Greiner, P.-M. Guyon, S. Hagmann, H. Hotop, W. R. Johnson, S. Joly, D. Liesen, J. W. McConkey, J. Wm. McGowan, P. H. Mokler, B. Muller, R. H. Neynaber, V. D. Ob'edkov, J. Reinhardt, J. Roturier, H. Schmidt-Bocking, R. Schuch, G. Soff, H. S. Taylor, J. P. Thibau, J. Uzureau, M. J. van der Wiel.* **Symposia:** ELECTRON CAPTURE BY MULTIPLY-CHARGED IONS. Contributors: *D. H. Crandall, F. J. de Heer, R. McCarroll, A. Muller, R. E. Olson, M. N. Panov, H. Ryufuku, E. Salzborn, P. Valiron, T. Watanabe.* RYDBERG STATES OF ATOMS AND MOLECULES. Contributors: *J.-F. Delpech, T. F. Gallagher, M. Matsuzawa, R. D. Rundel, R. F. Stebbings.* STATE-RESOLVED ATOM (ION)—MOLECULE RO-VIBRATIONALLY INELASTIC AND REACTIVE SCATTERING. Contributors: *J. Andres, K. Bergmann, U. Buck, P. J. Dagdigian, U. Hefter, F. Huisken, I. Koyano, F. Linder, J. Schleusener, K. Tanaka, J. P. Toennies, F. Torello, J. Witt.* AMPLITUDES AND STATE PARAMETERS IN ATOMIC COLLISIONS. Contributors: *N. Andersen, T. Andersen, K. Blum, J. S. Dahler, R. Hippler, E. Horsdal Pedersen, V. Kempter, H. Kleinpoppen, H. O. Lutz, B. Menner, R. Morgenstern, S. E. Nielsen, J. Østgaard Olsen, J. Pfaff, B. Staudenmayer, J. F. Williams, L. Zehnle.* ELECTRON DETACHMENT IN NEGATIVE ION COLLISIONS. Contributors: *R. L. Champion, Yu. N. Demkov, V. Esaulov, J. P. Gauyacq, A. Herzenberg, J. S. Risley.* ATOMIC AND MOLECULAR COLLISION PROCESSES UNDER THE INFLUENCE OF STRONG RADIATION FIELDS. Contributors: *D. Andrick, C. Brechignac, Ph. Cahuzac, P. L. De Vries, T. F. George, I. V. Hertel, K. S. Lam, W. H. Miller, A. E. Orel, P. E. Toschek, J. Weiner.* NEW THEORETICAL METHODS. Contributors: *R. J. Damburg, V. V. Kolosov, Vo Ky Lan, M. Le Dorneuf, J. Macek.* NEW EXPERIMENTAL TECHNIQUES. Contributors: *T. Arikawa, B. Bederson, N. R. Gentry, K. K. Jung, S. R. Leone, J. Los, W. H. Pence, R. W. Wijnaendts van Resandt.* Author Index.

ICPEAC XI

11th International Conference on the Physics of Electronic and Atomic Collisions, August 29 - September 4, 1979, Kyoto, Japan.

Abstracts of All Papers

edited by N. ODA, *and* K. TAKAYANAGI.

1979. 1080 pages.
Price: US $122.00/Dfl. 250.00
ISBN 0-444-85393-6

This volume contains the abstracts of all the papers presented at the 11th ICPEAC Conference. The papers cover various aspects of electronic and atomic collisions. The extraordinary diversity of topics discussed can best be seen from the extensive section headings.

ANNOUNCING:

SOLID STATE IONICS

An interdisciplinary journal devoted to experimental and theoretical research involving properties related to ionic transport phenomena in solids.

Editors:

Principal Editor:

M. Stanley Whittingham
Corporate Research, Exxon Research and Engineering Company, P.O. Box 45, Linden, N.J. 07036 U.S.A.

Coordinating Editor - Europe:

Brian C. H. Steele, Imperial College, London, U.K.
Robert A. Huggins, Stanford University, CA, U.S.A.
K. Funke, Technical University, Hanover, Germany.
Michel Kleitz, ENSEEG, France.
Priya Vashishta, Argonne National Laboratory, IL, U.S.A.
H. Rickert, Universität Dortmund, Germany

Associate Editorial Board:

D. A. J. Rand *(Australia);* R. R. Haering *(Canada);* Li-Chuan Chen *(China);* M. B. Armand, R. Comes, P. Hagenmuller and J. Rouxel *(France);* A. Rabenau and R. Schöllhorn *(F. R. G.);* B. Scrosati *(Italy);* T. Takahashi, N. Watanabe *(Japan);* J. Schoonman *(The Netherlands);* S. M. Mrowec *(Poland);* A. Lunden *(Sweden);* H. Beyeler *(Switzerland);* R. D. Armstrong, J. B. Goodenough, B. C. Tofield *(U.K.);* J. B. Bates, G. C. Farrington, G. G. Libowitz, G. D. Mahan, J. N. Mundy, D. W. Murphy, B. B. Owens, W. L. Roth, A. H. Thompson and D. H. Whitmore *(U.S.A.).*

Scope:

This interdisciplinary journal is devoted to the physics, chemistry and materials science of ion transport phenomena in solids, and properties resulting from ion mobility. It is anticipated that papers on topics such as the following will constitute the major part of each issue: physics and chemistry of defects; ionic transport measurements and mechanisms; theories of ion transport; incorporation of ions into electronic conductors; many aspects of solid state electro-chemistry/physics including interfacial properties; processes such as corrosion oxidation, sintering and other solid state reactions. Related technological applications such as batteries, fuel cells, electrochromic displays, solid state chemical sensors, hydrogen storage materials, catalysis, photography, electrolysis cells, metal winning, etc., will also be included, provided that the performance characteristics are interpreted in terms of the relevant ionic transport processes. Review papers and relevant symposium proceedings are welcome.

Papers scheduled for publication in Vol. 1:

Thermodynamic and Phase Equilibrium Studies of the Fast Solid Ionic Conductor $LiAlCl_4$ *(W. Weppner and R. A. Huggins).* Retarded Ionic Motion in Fluorites *(J. Schoonman).* Two Types of Graphite Fluorides, $(CF)_n$ and $(C_2F)_n$, and Discharge Characteristics and Mechanisms of Electrodes of $(CF)_n$ and $(C_2F)_n$ in Lithium Batteries *(N. Watanabe).* Crystal Growth and Structural Properties of some Hollandites *(H. U. Beyeler and C. Schüler).* Crystal Structure and Ion-Ion Correlation of Ion-rich β Alumina Type Compounds: I. Magnesium Doped Potassium Rich ß Alumina *(G. Collin, R. Comes, J. P. Boilot and Ph. Colomban).* Crystal Structure and Ion-Ion Correlation in Ion-rich ß Alumina Type Compounds: II. Potassium ß Ferrite *(J. P. Boilot, Ph. Colomban, G. Collin and R. Comes).* The Electrochemical Reaction of Li with VSe_2 and Implications on the Ionicity of Intercalation Compounds *(A. H. Thompson, J. C. Scanlan and C. R. Symon).* Polarizability of Ions in Crystals *(G. D. Mahan).* Infrared Absorption and Raman Scattering from H_2O in $Na_{1-x}Li_x$ Beta Aluminas *(J. B. Bates, R. Frech, H. Engstrom, J. C. Wang and T. Kaneda).* The Growth of Single Crystal Lithium-Aluminum, $^7LiA1$ *(S. Susman and T. O. Brun).* Silver Ionic and Electronic Conductivity in Ag_9GaS_6 *(E. E. Hellstrom and J. Schoonman).* Synthesis and Characterization of New Solid Electrolyte Conductors of Lithium Ions *(A. Levasseur, J. C. Brethous, J. M. Reau, P. Hagenmuller and M. Couzi).* Evidence for a Structural Phase Change in the Fast-ion Conductor $Na_3Sc_2P_3O_{12}$ *(C. J. Delbecq, S. A. Marshall and S. Susman).*

Submission of Manuscripts:

All manuscripts will be refereed and should be submitted to a member of the Associate Editorial Board or to one of the Editors. The journal offers two modes of publication: **rapid publication,** for which papers may be submitted in camera-ready format, or, **conventional publication,** in which case manuscripts will be reproduced by conventional printing, and the authors will receive proofs.

Subscription Information:

1980: Volume 1 (1 volume in 6 issues)
Subscription price for 1980: US $74.75/Dfl. 146.00 including postage and handling.
